

1200 Handheld Terminal

Simple configuration of tank gauging communication equipment

Applications

The Model 1200 Handheld Terminal is a device used to support configuration of all Endress+Hauser equipment with HART® and ATTI bus, such as:

- 4000 Advanced Technology Transmitter (ATT)
- 4110 HART® Level Encoder
- 4120 Multi-Element Temperature Transmitter (METT)
- 4200 Multi-Function Transmitter (MFT)

Features

- Large supertwist graphics LCD 26 X 10 display
- 34-key sealed membrane keyboard with full alpha on one shift level
- Intrinsically safe design
- Rugged, low-profile Lexan case

Measuring System

The 1200 can be connected at any point in the field communications loop using an interface cable with two "banana" plugs. The 1200 may also be attached to the terminals in most Endress+Hauser products, such as the 4000 ATT. It is also able to configure companion devices connected to the 4000 ATT, such as the 4120 MFT, 4040 Local Display Unit and the 4050 Digital Input/Output Unit.

Operation

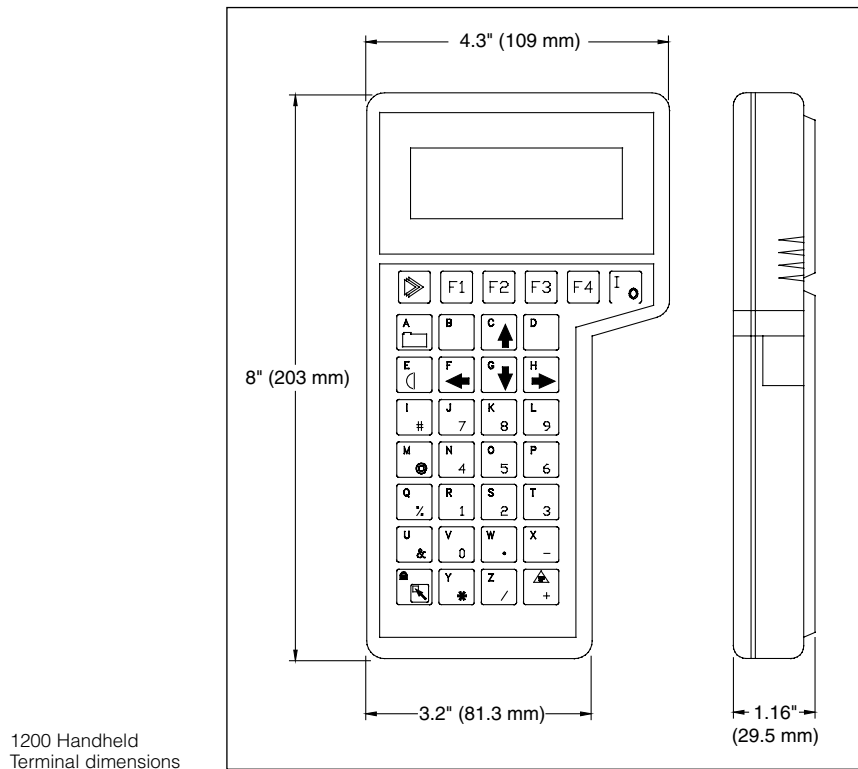

Ease of use was a prime consideration in the design of the 1200. The unit is light and easy to grip in one hand. All alpha keys are accessed through a single shift key. High speed communications ensure fast response and virtually eliminate "com error" messages.

Approvals

The 1200 Handheld terminal is FM approved for use in intrinsically safe areas.

Ordering

When ordering, please use the product designation "N1200" Handheld Terminal. The 1200 Handheld Terminal weighs 2lbs (0.9kg) and comes complete with a carrying case, strap, interface cable and three "AA" batteries.
